

Privacy Policy

Effective Date: 07 September 2025

Overview

This extension is designed to help users export property listings from [Rightmove](#) into an Excel file for their own personal use. We value your privacy and are committed to protecting your data.

Data Collection

- The extension does **not** collect, store, or transmit any personal information.
- All property listing data is obtained directly from Rightmove when you visit the site.
- Data is processed **locally within your browser** and never sent to external servers, except when the user explicitly clicks links to [propertysheets.com](#) for additional details.

Data Usage

- The listing data scraped from Rightmove is only used to generate the downloadable Excel file requested by the user.
- Links to **propertysheets.com** may be provided within the interface to allow access to enriched property data and images. This access is entirely optional and user-initiated.

Data Sharing

- We do not share, sell, or transfer any user data to third parties.
- No advertising or tracking cookies are used.
